

The Qur'anic Garden at Kew

Project Overview - To celebrate the opening of the new Qur'anic Garden exhibit in Kew Gardens, a smaller structure was required to showcase the plants

ES Group's Role - ES Group installed a custom built structure which was an adapted version of ES Group's 'superstructure' which has been used previously at Sandhurst Music on Fire and Goodwood Festival of Speed. The temporary structure had a wind load of 26.3 m/s and cross bracing at each end to increase its stability

Project Title - The Qur'anic Garden at Kew

Client - Flux Event Design and Production/Qatar Foundation

Engineers - Momentum

Location - London, UK

Project Value - £47,000

Project Duration - 3 months

Project Completion - May, 2010

Build Period - 3 days

Dismantling Period - 2 days

Construction - ESS superstructure
